

IKEv2 INSTALLATION GUIDE WINDOWS 11

This guide will help you to set up the connection to our servers in a few simple steps. You only need to do this once, when you are about to use VictoryVPN for the first time.

You'll also receive some instructions on how to connect and disconnect the VPN connection, and instructions if you're planning to watch TV or streaming services.

	C 1		
Save	Cancel		

Step 4: Click the arrow in the marked area and select "Windows (built-in)".

Add a VPN connection

Step 5:

VPN provider Windows (built-in)	 (1) In the field "Connection Name", you give your connection a name. This needs to be unique which means no other 	
VictoryVPN IKEv2	connection can't have the same name.	
Server name or address ikev2-us.victoryvpn.com	We recommend that you name it VictoryVPN IKEv2 ", but you can give any name you'd like.	
VPN type IKEv2 ~	(2) In the field "Server name or address", enter "ikev2.victoryvpn.com".	
Type of sign-in info Username and password ~	(3) In the field " VPN-Type ", you choose the protocol to be used. In this case " IKEv2 ".	
Username (optional) Your Username Password (optional)	(4) In the field " Username (optional) ", enter your username that you chose when creating your account.	
Save Cancel	(5) In the field " Password (optional) ", you enter your password that you chose when creating your account.	

Finally, you click **save** at the bottom.

PART 2: CONNECTING TO VICTORYVPN

< :	Settings		- 0 ×

You can also connect from the activity bar by opening your network connections (1). When you open your network connections, you'll see the window in the picture. From there, you can **choose your connection**(2) and click "**Connect**".

To disconnect, simply press "**Disconnect**" which can be found in the same place as the connect button.

PART 3: TV AND STREAMING SERVICES

If you're planning to use VictoryVPN to watch TV and streaming services. You might need to deactivate IPv6 (Internet Protocol Version 6), if it is not working. Follow the steps below to deactivate IPv6.

Step 1: Type "network" (1) in the search bar.

Steg 2: Click "View network connections" (2).

Step 1: Right click on your VictoryVPN connection (1).

Step 2: Select "Properties" (2) at the bottom of the menu.

In the new window that pops up, follow the steps below:

Step 1: Click the tab "Networking" (1).

Step 2: Uncheck "Internet Protocol Version 6 (TCP/IPv6)" (2).

Step 3: Click "OK" to save your changes.

Next, clear the cache/cookies of the browser you're using to watch TV or streaming services with. If you don't know how to do this, you can google

"clear cache cookies" followed by the name of the browser you are using.

Finally, try connecting to VictoryVPN again and see if the TV or streaming service works. If not, feel free to reach out to us!
